

Empowering financial enterprises.

Customers trust you to do more than just check the boxes. Sonatype empowers digital transformation in Financial institutions so you can innovate with the best in open source and software supply chain management.

Safeguard applications

Protect your customers and bottom line.

Fintech has seen a surge with a 700% increase in open source malware attacks. Avoid the \$4 billion average cost of a data breach and reach digital transformation with:

- ▶ Actionable intelligence to stop security threats with **Sonatype Repository Firewall**.
- ▶ Continuous monitoring and automated alerts with **Sonatype Lifecycle**.

Increase developer velocity

Find the sweet spot between security and productivity.

Developers can focus on their core tasks knowing that the components they use meet the organization's security requirements. Deliver applications faster, more secure, and at scale to:

- ▶ Prevent unplanned work by only using clean components with **Sonatype Lifecycle**.
- ▶ Enhance team collaboration and speed up software delivery with **Sonatype Nexus Repository**.

Scale security and compliance

Handle cyber incidents like a pro.

The Securities and Exchange Commission (SEC) wants required public disclosures about cybersecurity incidents within days of discovery and regular cybersecurity assessments. Exceed these requirements with Sonatype and:

- ▶ Keep a real-time inventory of open source components with **Sonatype Nexus Repository**.
- ▶ Adhere to PCI compliance, company policies, and industry-specific regulations with **Sonatype Lifecycle add-ons**.

Sonatype is the software supply chain management company. We enable organizations to innovate faster in a highly competitive market. Our industry-leading platform empowers engineers to develop software fearlessly and focus on building products that power businesses. Sonatype researchers have analyzed more than 120 million open source components – 40x more than its competitors – and the Sonatype platform has automatically blocked over 115,000 malicious components from attacking software development pipelines. Enabling high-quality, secure software helps organizations meet their business needs and those of their customers and partners. More than 2,000 organizations, including 70% of the Fortune 100 and 15 million software developers, rely on our tools and guidance to be ambitious, move fast and do it securely.
